

PRESS RELEASE

Accipiter Radar celebrates 20 Years of Surveillance and Intelligence Solutions

July 8, 2014

Niagara, Ontario, Canada/Niagara, New York, USA

For Immediate Release

Dr. Tim J. Nohara, Accipiter Radar President & CEO accepting 20th Anniversary award from Pelham Regional Council Member, Mr. Brian Bady, June 20th, 2014

Accipiter Radar is celebrating its 20th Anniversary in 2014. From humble beginnings as a radar software developer, the Niagara company is flourishing as a leader in radar technology, providing its unique surveillance and intelligence solutions on a global basis.

On June 20th, Accipiter marked this important milestone with an event for family, friends, business associates and Niagara dignitaries who presented several awards to the company.

“We are delighted to be celebrating our 20th Anniversary” said Dr. Tim J. Nohara, founder, President and CEO of Accipiter Radar. “Our talented and dedicated team continues to grow, providing local employment and we are proud to represent the Niagara Region, delivering some of the best Canadian technology around the world.”

Recognized as pioneers in the radar surveillance industry, Accipiter delivers systems coast to coast throughout North America and as far as the Middle East and Australia for government, military and private customers. Accipiter’s new class of radar solutions combine patented software and architecture with common off-the-shelf products and technology to affordably supply outstanding military-grade performance to the RCMP, DND, NAV Canada, DHS, DoD and the FAA.

Accipiter is committed to providing products and services that positively impact the environment and safety. The company’s systems are deployed for homeland security such as border protection, port security and law enforcement, as well as wildlife management, aircraft bird strike prevention, and wind farm and mining applications to protect wildlife.

About Accipiter Radar

Accipiter Radar is a North American company that develops, sells, and operates high-performance radar and sensor information networks engineered to monitor the environment and to characterize the behaviour of targets such as small vessels, low flying aircraft, vehicles and birds, as well as distributed phenomenon such as weather, waves and snow/ice. The result is enhanced wide-area safety and security through unprecedented domain awareness for 21st century applications including homeland security, law enforcement, critical infrastructure protection, bird strike prevention and environmental protection. Accipiter Radar Technologies Inc. of Niagara, Ontario Canada and Accipiter Radar Corporation of Orchard Park, New York, USA are dedicated to “targeting a safer world” and have won the business of all levels of government in North America, as well as major corporations and governments in various parts of the world.
